

## New digital testing device K154433N50 for wear-potentiometers on Knorr-Bremse air disc brakes.

As part of a continuous development and optimization process, the Knorr-Bremse digital potentiometer testing device has now been updated – Part Number remains the same.

The new device can be used for:

- testing of potentiometer functionality on Knorr-Bremse air disc brakes.
- checking the wear condition of the brake pads and discs.

**Note:** In the event that a wear sensing fault is indicated by the vehicle's monitoring system, e.g. within the cab, Knorr-Bremse recommends checking the functionality of the disc brake potentiometers with this device before replacing a caliper. If the potentiometer works properly the cause of the fault should be further investigated as it is likely that the caliper does not need to be replaced.

### Product description:

The testing device can be used for all current Knorr-Bremse air disc brakes with continuous or black/white potentiometers.

Please also refer to the service manuals for Knorr-Bremse air disc brakes and specifications of the vehicle manufacturers. You will find Knorr-Bremse service manuals on our website [www.knorr-bremseCVS.com](http://www.knorr-bremseCVS.com)

### Product improvements:

- **Additional verification of black/white potentiometers**
- **Additional display of the wear condition (red and green LED)**
- **Rotary switch allows selection of the wear display mode**
- **Cable with plug for quick cable change**
- **Only 2 connector cables**
- **Clearer labelling and display**

### Package content:

- Testing device
  - 2 connector cables
  - Detailed user manual
- Battery not included*
