

New Park/Shunt Valves

Knorr-Bremse offers reliable products with high quality. The continuous enhancement of our products leads to changes in material or production process and currently to the new Park/Shunt Valves shown below.

New Body design for Park/Shunt Valves AE42 type

To achieve rationalisation two new variants have been created to replace the four valves listed below.

This has been done by a new design of body with threaded inserts and the elimination of additional equipment. Thus the new valves will not be available as before with the chain and plate.

Minor mounting and piping modifications may be required.

New body for selected AE42 type valves

Please see below the four part numbers mentioned and the new part numbers which replace them.

Existing (old) Part Number	Existing (old) Type Number		Replacement (New) Part Number	New Type Number	
II36127	AE4247	 with check valve	K111131N00*	AE4247	
II36131	AE4247	 with check valve, plate and chain			
II36128	AE4230	 with plate	K111132N00*	AE4230	
II36129	AE4247	 with plate and chain			

* Note: If required a suitable plate can be ordered separately under part number EB01615.

**Please note that existing stock can be used up completely
but from now on place your orders on the new part numbers.**
